

My name
is John.

I have been
attending FACET
since I was 17.

I am training to become a carpenter, and I have learnt many new skills in health and safety, wood machining, construction techniques and finishing. I have achieved my Entry Level 2 with the NPTC (City and Guilds) in Skills for Working Life (woodwork). In addition to my training, I also do voluntary work in FACET's workshop. I really enjoy supporting the other students, especially when we do work in the local community. Also FACET has provided me with the equipment I need to set up my own lawn mowing service.

FACET has been awarded approved centre status by the National Proficiency Tests Council (part of City and Guilds). We deliver accredited and vocational training in a wide variety of skills to adults aged 16+ with any form of disability. We aim to provide people with the skills needed to live independently, lead a healthy life style and most importantly to progress towards employment.

Our key programmes are:

Towards Independence:

Independent living skills, life skills and community-based projects

Skills2Employ:

Skills for Working Life training available through 'FACET Homes and Gardens' (our Charity Shop), FACET Garden Centre and Nursery, FACET Carpentry Services, FACET Catering and Hospitality and our programme of Job Clubs.

Sport-Ability:

A variety of sport and leisure activities are available, including carpet bowls, golf and football and other sports soon to come on stream.

Where we are based

Our premises are located on the Marwick Road Industrial Estate in March, in the heart of the Fenland area of Cambridgeshire. We draw our students from across the whole of Fenland, which covers some 200 square miles. The Fens are predominantly rural and generally lack opportunity, especially for people with disabilities. For this reason, FACET has become the focus of the daily lives of the students who attend our social training enterprise.
